THE TIGER CLAN

WHITEPAPER

2022

CONTENTS

ABSTRACT

With the introduction of blockchain technology, the world of gaming has transformed in exponential ways. Not only is the user experience evolving with the rise in games with earning mechanisms, allowing an immersive experience and the business model. What once was the gaming environment with players only spending money to play games now with blockchain and crypto rewards its player for playing.

The **Tiger Clan** seeks to dynamically embrace the most promising sectors of the industry by building racing games, NFT, and a play-to-earn ecosystem, backed by a successful team of experts. The Tiger Clan is a blockchain gaming platform that brings together a game with NFT, metaverse, and crypto tokens. We believe in **AI, blockchain, web 3.0** innovation with upcoming technologies. Web 3.0 is the next generation of the internet, in which websites and apps will be able to handle data in a clever human-like manner using technologies such as machine learning, big data, decentralized ledger technology, and so on.

A key difference between The **Tiger Clan** and a traditional racing game is that we will use AI to manage our races in the game. Due to AI our software automatically determines who is the winner of the race. We're even going to extend our vehicles and objects to 3D animating.

MARKET ANALYSIS

The Racing Games Industry is expecting an **expansion of 11.6%** in the forecast period. The racing video game is a platform that allows the player to compete. Racing games are a popular medium of games owing to a penchant for car games and improvement in graphics and sound quality. Emerging economies record the highest rate of online racing game players.

Total revenue in the Racing Games segment is projected to reach **$3,207m in 2022**. In-app purchase (IAP) revenue in the Racing Games segment is projected to reach **$1,790m in 2022**. Paid app revenue in the Racing Games segment is projected to reach **$29m in 2022**. The Racing Games Market can expect to touch a valuation of **$13.64 Billion by 2030.**

ABOUT THE TIGER CLAN

Our team is excited to bring you **The Tiger Clan**, the new NFT collection created by a team of well-skilled artists to become the best NFT collection and build up an ecosystem with actual utilities of **GameFi models**. Our project aims to deliver a play-to-earn racing game that uses NFT and is powered by the TTCC token. The Tiger Clan is a metaverse racing game where players can participate in the game by avoiding obstacles. Players can earn tokens as a reward with successful play.

On our expedition to become the best, we will operate with integrity, transparency, and respect for our **TTC family**. The standard for most NFT projects is to focus solely on aggressive marketing pushes, cult mentality, they strike when the anvil is hot, and think about the use case later. With The Tiger Clan, we intend to bring you the best of both worlds by implementing **solid utility and a strong community.**

There is no denying that **NFTs and P2E** have far surpassed industry expectations but we recognize and know there is always room for improvement. We believe in the future of Blockchain and NFT in the gaming world and there is an opportunity now to build good reliable products and a strong economy from gaming. It is focused on maximizing community and Players satisfaction as primary objectives while producing high-quality and highly desirable NFT collections that will be synonymous across a wide range of categories to maximize appeal.

$TTCC TOKEN

$TTCC will be used as currency in The Tiger Clan ecosystem. By combining the power of blockchain and cryptocurrency, We will create a token that will be used to reward the winner of the game. **Any trade in The Tiger Clan ecosystem will be through $TTCC**. Blockchain technology and the token economy enable The Tiger Clan to be the true community, incentive system, and membership.

$TTCC will use as:

- Native Currency used for all activities in-game
- Reward Currency for the winner of the race

THE TIGER CLAN
NFT COLLECTION

Non-Fungible Token (NFT) is also known as digital art or digital collection. Unchangeable Tokens; a tweet, a painting, a picture, a memory, a gif, a football player card, etc. they can represent objects

The Tiger Clan is a 3D collection of 10,000 Tigers living in the Ethereum blockchain. Every NFT model is unique with special characteristics only limited to that character. The holders of The Tiger NFTs can earn multiple benefits from this. The benefits range from use in the Play-to-Earn model game to being able to raffle in the game.

The Tiger Clan project is developed by keeping the end-users in mind. The true purpose of blockchain and its use cases is to provide **more control and benefit to the end-users.**

We aim to deliver the most utilizes to our players and members. Our goal is to push the technology boundary of decentralized blockchain and NFT by building a racing game that will reward the player with native currency, the player will be able to play with their NFTs and in which owners of The Tiger Clan can interact with one another in a digital world, transact with $TTCC as a currency.

The **possibilities are endless** in The Tiger Clan ecosystem. The Tiger Clan NFT is a key allowing the holders to enter the game we are building.

STAKING

Staking pools for users providing liquidity will be available. Therefore, returning rewards from the platform back to NFT holders is a hallmark of decentralization. Staking is the most effortless way to earn the reward. Holders can stake their tiger NFTs to earn rewards from the platform.

The reward depends upon the number of NFTs and the time for which they stake their NFTs. To make things more interesting and to create a competitive environment in the tiger clan, the staking will also depend on your performance in the game. The higher you are in the Game leaderboard the more you $TTCC you will earn Staking your NFT.

BENEFITS

Some benefits of The Tiger Clan NFT are given below

01 *Access to giveaways*

02 *Eligibility for free NFT airdrops*

03 *Tiger NFT Holders will get a TTCC Digital Car at zero costs*

04 *Acquiring Tiger NFT will give you VIP access to the TTCC family*

05 *Our privileged TTCC family will enjoy member-only benefits, membership cards, TTCC tokens, and other perks*

06 *Each raffle winner will receive a unique Tiger NFT*

OUR MISSION

PLAY

Play our racing game and enjoy the journey.

EARN

Earn while you play the game by racing the cars.

GROW

Grow with us. Get privileged membership of our TTC family by writing a smart contract and enjoy more benefits.

WHY US?

We can claim that our NFT collection will **undoubtedly boom** in the market with these **unique and impressive qualities**. Each NFT image has a digital signature that makes it impossible to duplicate, making it unique. Each tiger is unique and has a unique production process. Furthermore, an NFT can only be owned by one person. This way, NFT holders can gain control and ownership over their data.

KEY VALUES

○ *We Are Trusted And Loyal*

We value integrity and transparency over profit. Our highest priority is to protect our customers, partners, and community members.

○ *We Are Progressive*

We are industry pioneers willing to go to new places. We act and move swiftly and dismiss contemplation.

○ *We Bring Value*

We accept only the world's finest assets and create value for all participants in our community.

○ *We Are Adaptive*

We create future-proof solutions by embedding flexibility and having the ability to rapidly respond to changing market and customer needs.

○ *We are responsible*

We don't make concessions when it comes to our principles and mission. As a result, we have a strong policy in place to ensure that our economy is free of harmful actors and assets.

Total Supply

1,000,000,000 Tokens

TOKEN DISTRIBUTION

- MARKETING
- COMPANY RESERVE
- PUBLIC SALE
- PRESALE
- DEVELOPMENT
- LIQUIDITY POOL

ROADMAP

PHASE 1

The Tiger Clan will start with a limited number of unique NFTs.

We're going to launch with 10k items, including unique fine art pieces. Each tiger is unique and has a unique production process. We understand that the world's finest collectors value fine art.

Since we have such high standards, we're working slowly to produce the best tigers. We're a work in progress, but we're excited to announce that we'll officially start unveiling our tigers by the end of March 2022!

PHASE 2

We have an exciting new raffle, Airdrop, and NFT Token giveaway event where we'll pick investors randomly and gift them unique prizes!

Each raffle winner will receive a unique tiger NFT that'll have its own unique ID. Doesn't it sound exciting to have your very own unique tiger? We will announce the raffle winners soon. Each winner will be chosen by their ID, and they'll receive their unique tiger right after contacting us.

PHASE 3

Who wants to see a tiger motor running? That's right, everyone does, so we intend to make that possible by building a 3d animation of cars with our investor's NFT tigers on it. Only Tiger owners can join our exclusive online race. We're going to generate exciting car images that will combine the tiger IDs and their unique colors.

ROADMAP

PHASE 4

After we start racing, we're going to launch our own TTCC token in phase 4. After the launch of TTCC Tokens, all TTCC NFT holders will receive tokens as a reward!

PHASE 5

We use AI for managing our races, so our software determines who the winners are! We're even going to extend to 3D animating all the vehicles and objects, including horses, tigers, boats, dogs, and 100m men/women. The race will be out of this world, and that's a promise!

*Want to feel privileged? Our TTCC family will **have VIP access** and each TTCC NFT owner will receive a free object by writing a smart contract! We're sure that you just can't wait to watch your character's race in the Metaverse, neither can we!*
